

Cumulative Impacts of BMP Implementation – Maumee River Basin

Dr. Indrajeet Chaubey
Project Director

Dr. Jane Frankenberger

Agricultural and Biological Engineering
Purdue University

Partners

- Collaborative project involving
 - Purdue University
 - St. Joseph River Watershed Initiative
 - St. Marys River Watershed Project
 - Upper Maumee Watershed Project
 - Maumee River Basin Commission
 - Indiana State Department of Agriculture
 - USDA - NRCS
 - The Nature Conservancy

Overall Project Goal

Watershed modeling to inform watershed management

St. JOSEPH RIVER

GET INVOLVED!

There are many ways that you can help, from financial contributions to making basic landscaping changes!

Your Water. Your Future.

Overall Project Goal

Watershed modeling to inform watershed management

- 1. Estimate potential water quality improvements due to the installation of BMPs.**
- 2. Work with watershed groups to include BMP modeling results into their watershed management plans**

Watershed Plans

- Define current issues, critical areas, and plans for restoration

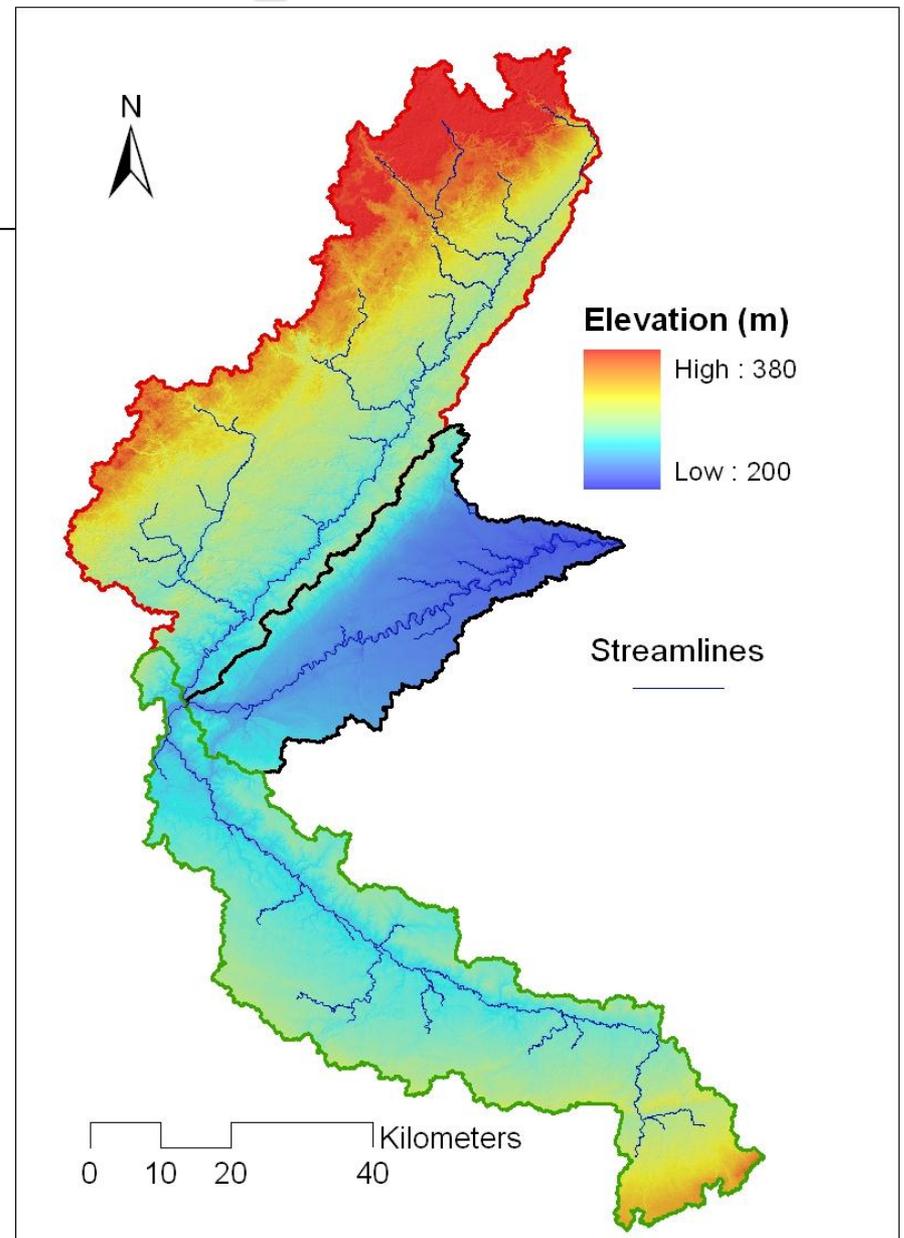

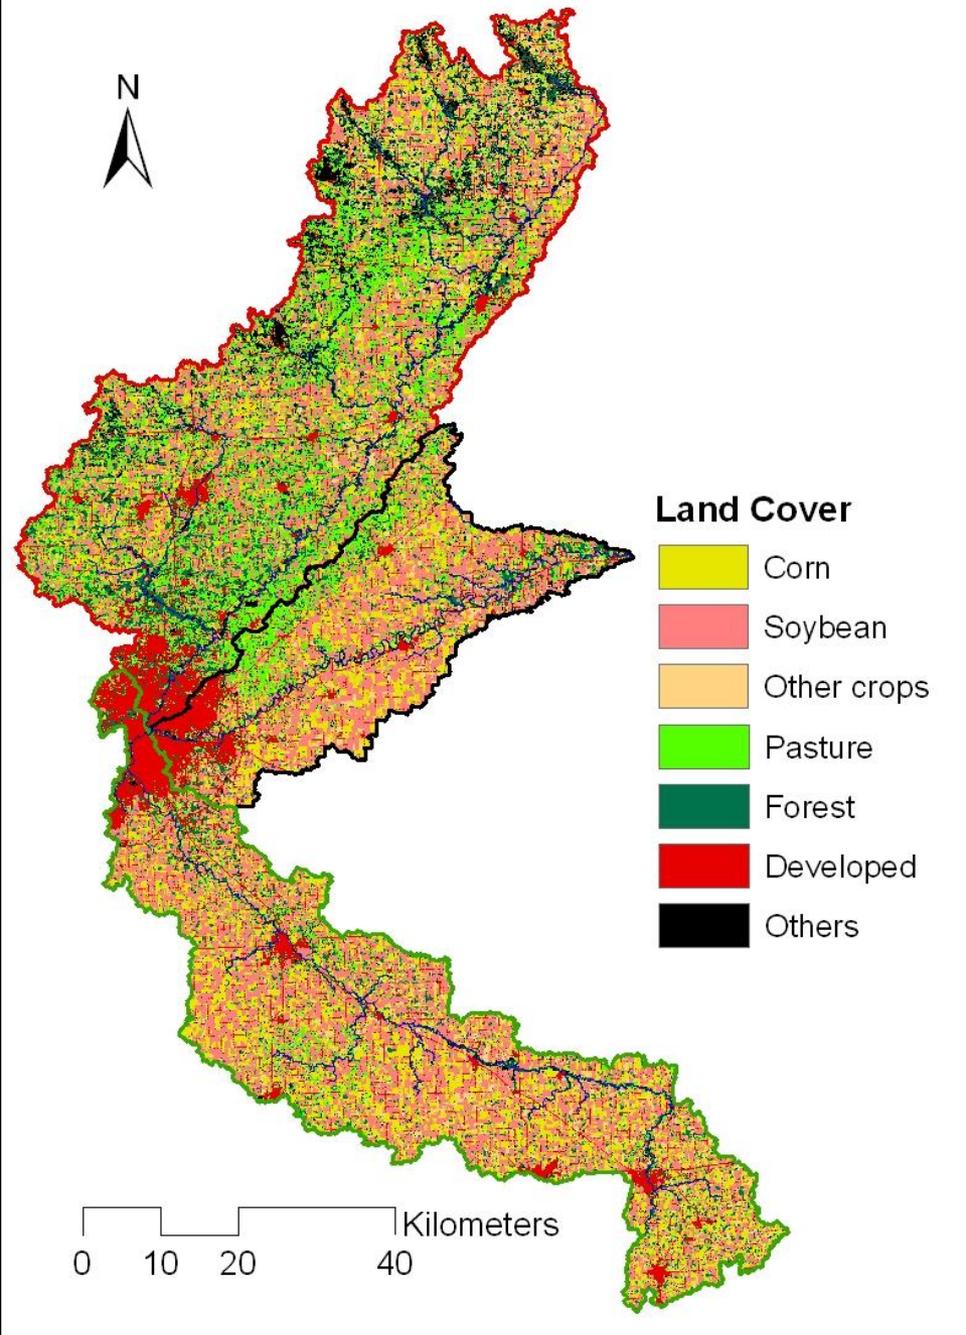

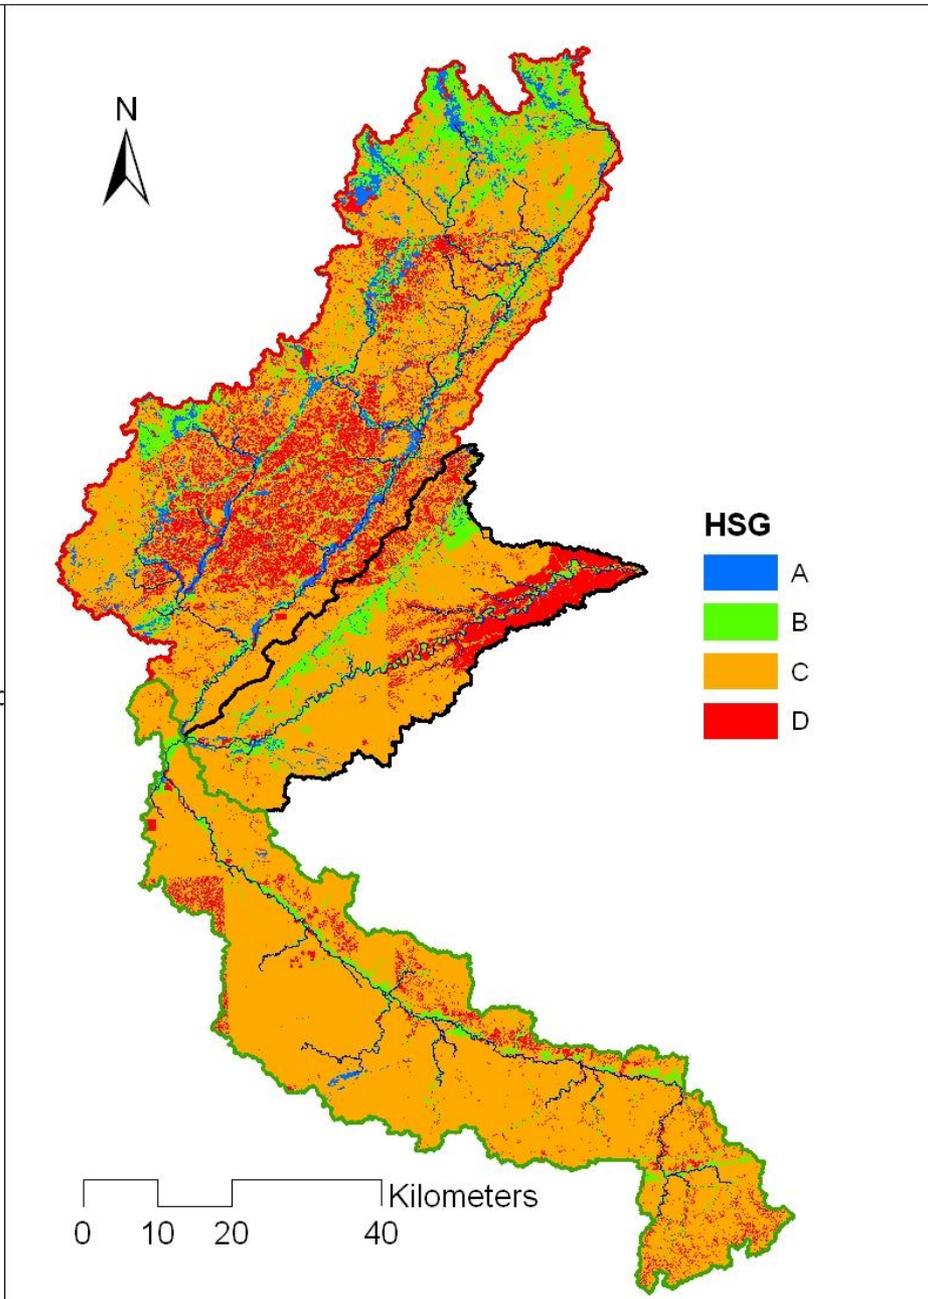

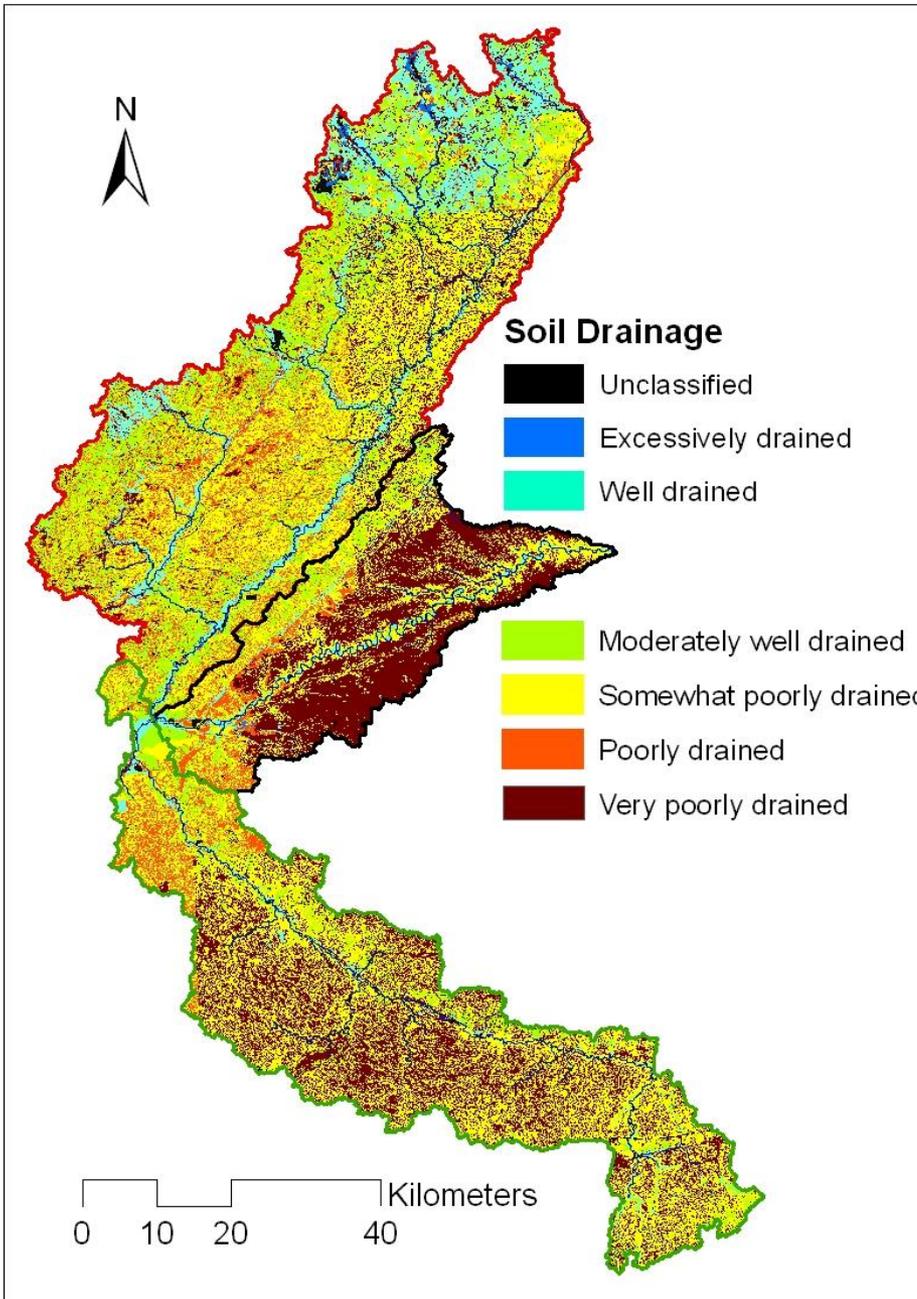

Lower St. Joseph – Bear Creek Watershed Management Plan

Prepared by:
The St. Joseph River Watershed Initiative
3718 New Vision Drive
Fort Wayne, Indiana 46845

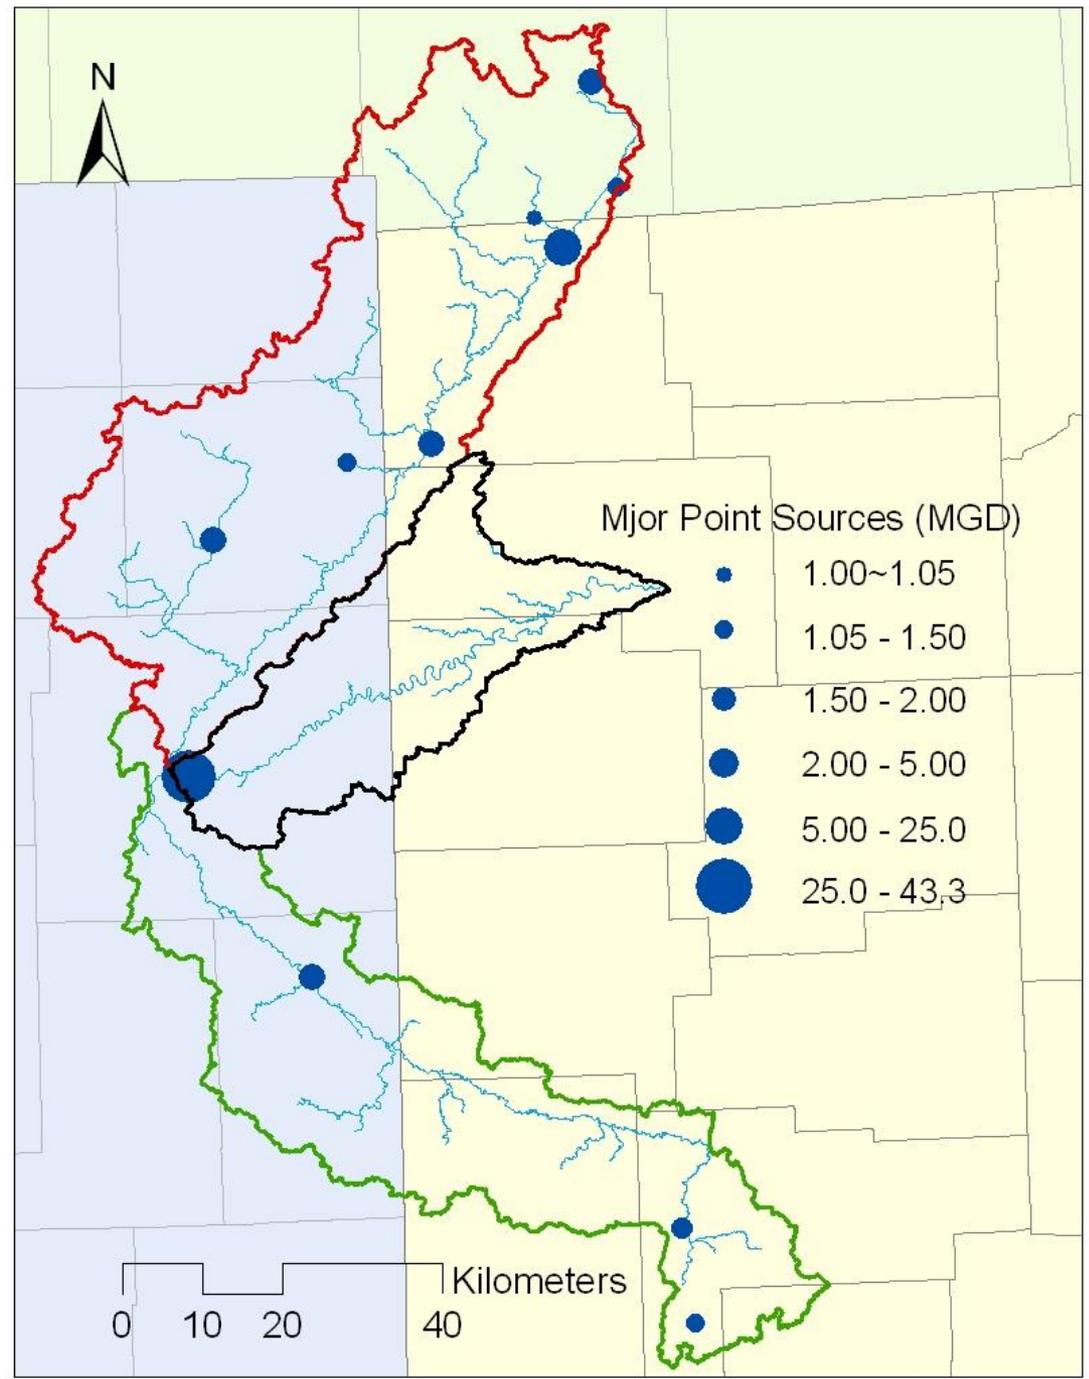

With funding from:
The City of Fort Wayne, Water Utilities Department
Under CWA Section 205(j) Grant, ARN A305 5-73
from the Indiana Department of Environmental Management

Input Data

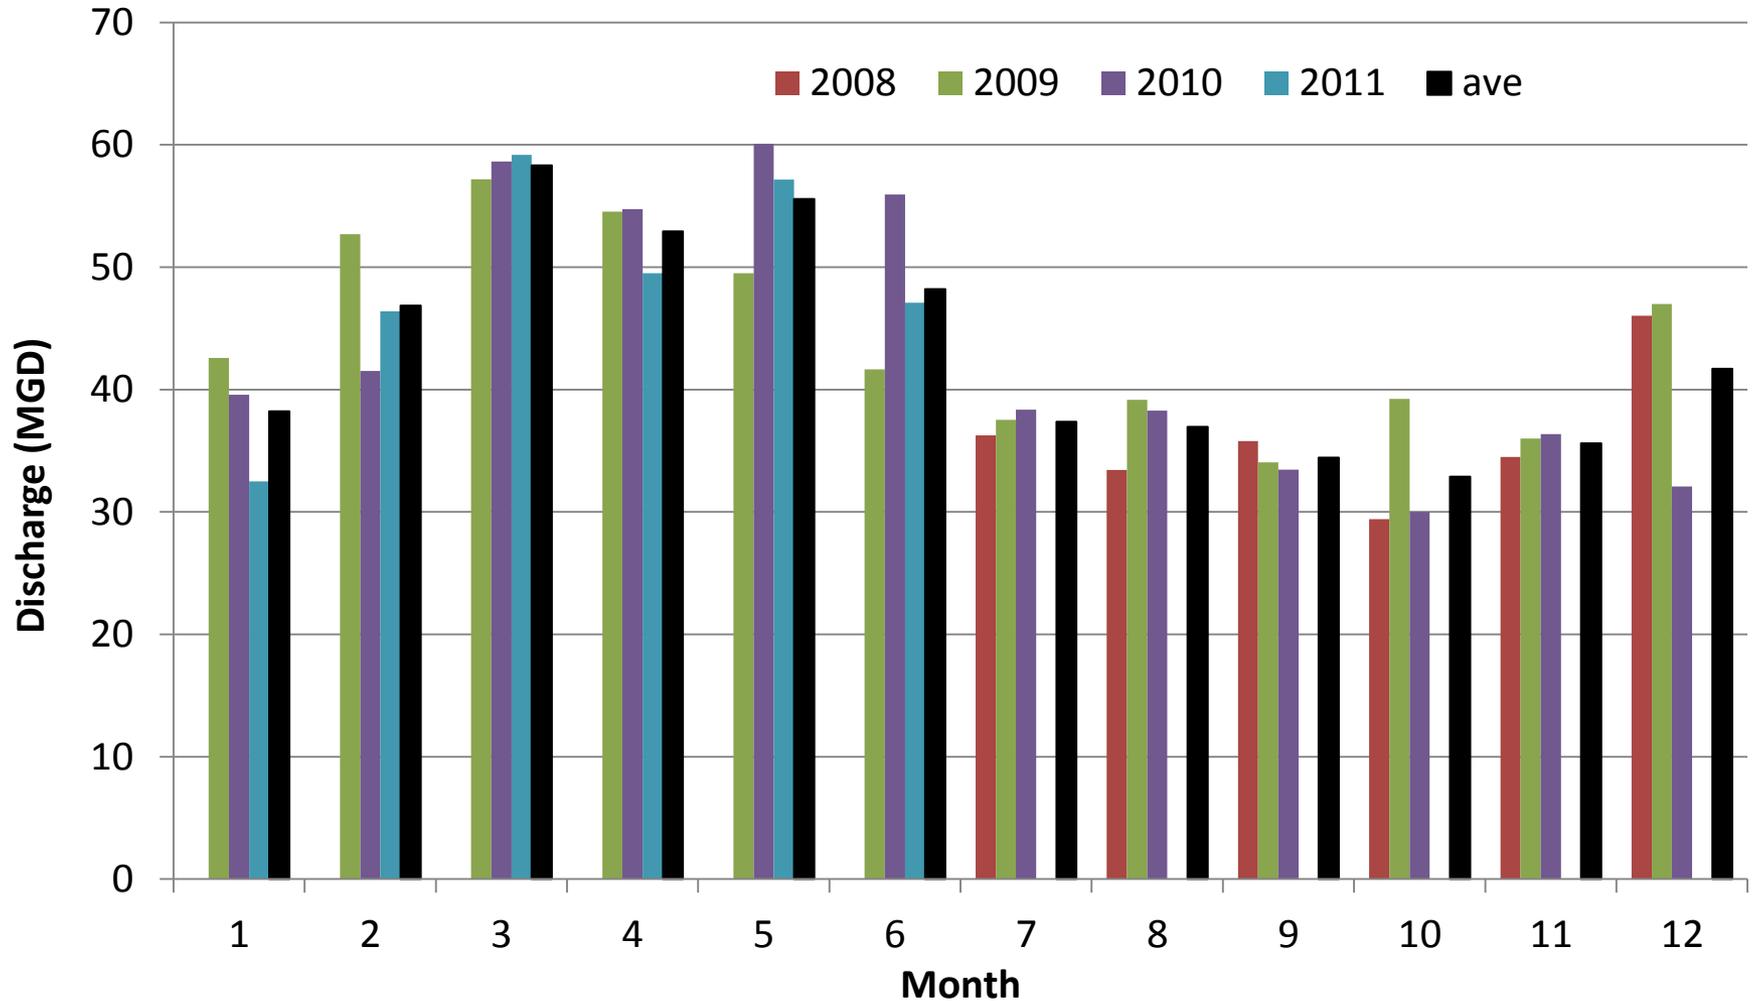

- **Input data:**
Point Sources
(Municipal
Wastewater
Treatment
Plants)

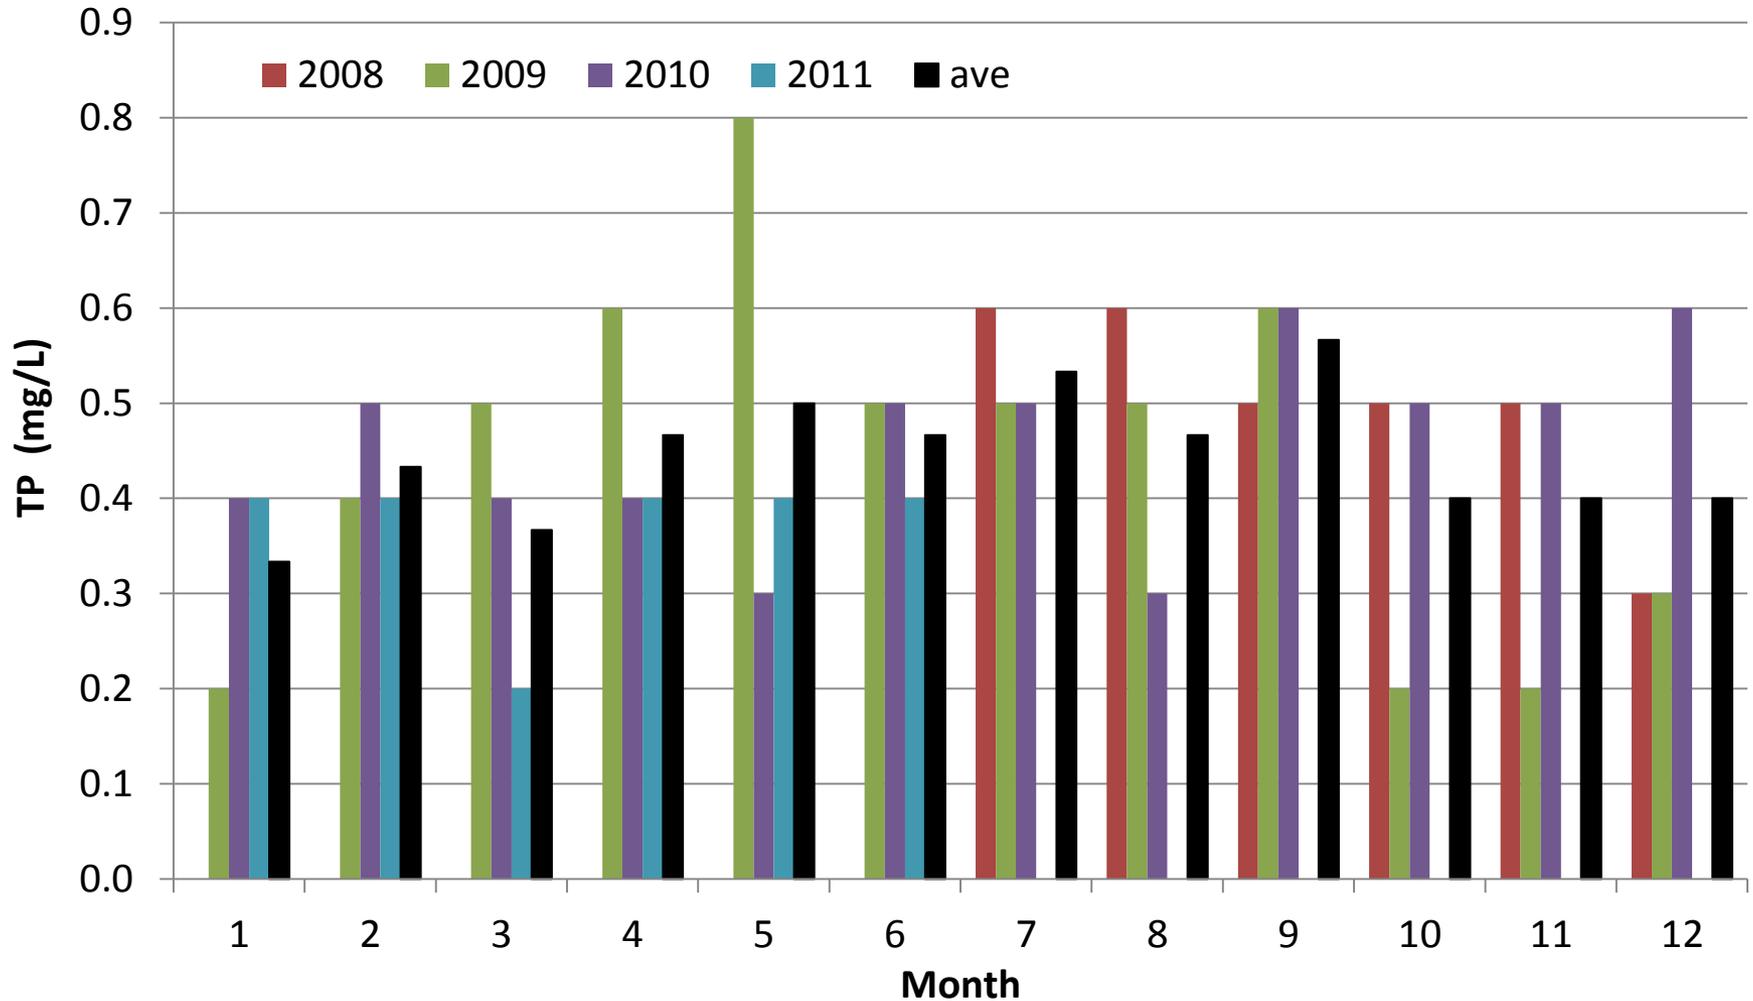

Water Quality Data

- EPA-ECHO point source – Discharge by month

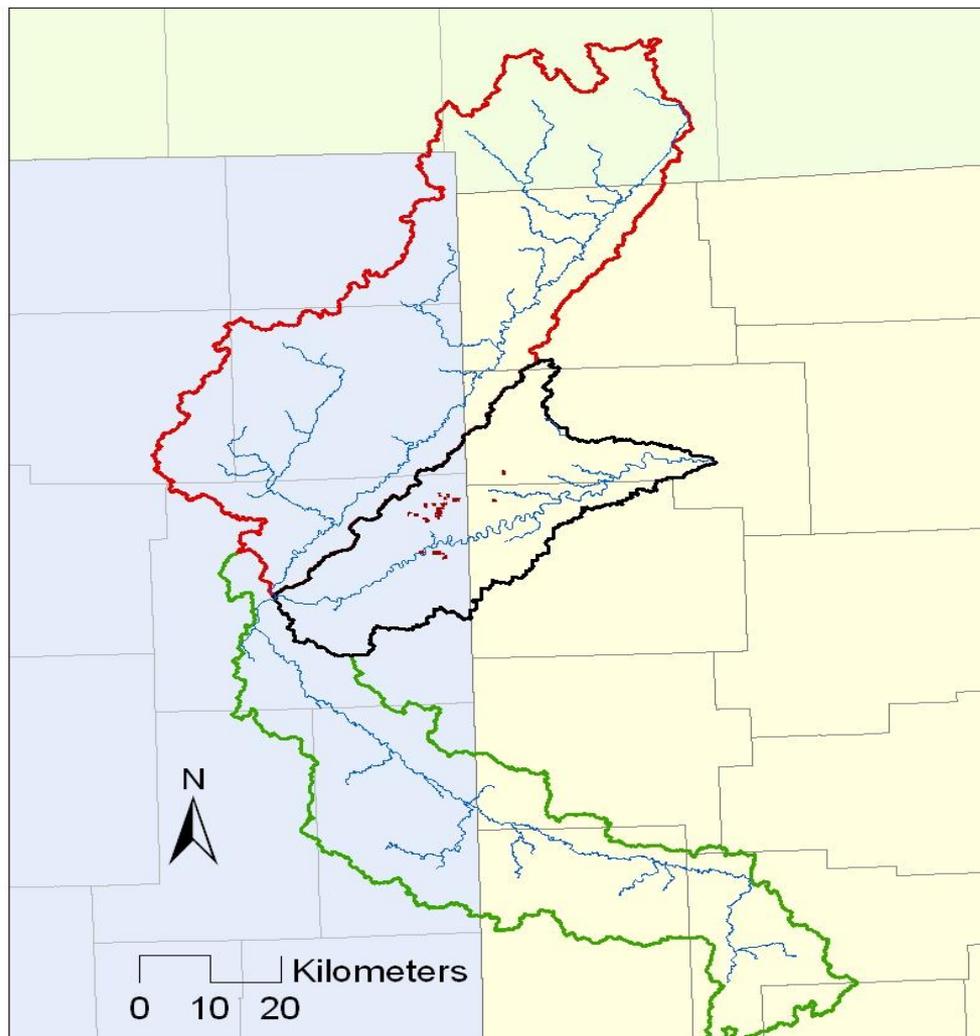

Water Quality Data

- EPA-ECHO point source –Phosphorus by month

Input data: Cultural data from farmer interviews

Crop Information

1	Crop Information								
2									
3	Farm Name	Example			Field ID	102511103		Crop	Beans
4	Field	3009			Watershed	Upper Maumee		Previous crop	Corn
5	Year	2011			Grower	102		Acres	107.1
6				Field #	103		Crop Rotation	C/B	

Planting Information

7	Planting Information							
8								
9	Planting Date	Planter Make	Planter Model	# Rows	Spacing (")	Acres	Row Clnrs (Y/N)	Other
10	7-May-11	John Deere	1770	32	15	107.1	Y	

Commercial Fertilizer Applied

11								
12	Commercial Fertilizer Applied							
13								
14	Date applied	Analysis	Appl Type	Rate/Ac - Unit	Total Qty - Unit	Equipment	Appl. Depth ('	
15	17-Dec-09	0-0-60	Broadcast-VRT	188.0 lb.	10.0674 ton	Teragator 1903	Broadcast	
16	17-Dec-09	11-52-0	Broadcast-VRT	42.0 lb.	2.2491 ton	Teragator 1903	Broadcast	
17	17-Dec-09	21-0-0	Broadcast-VRT	39.0 lb.	2.08845 ton	Teragator 1903	Broadcast	
18				lb.	ton			
19				lb.	ton			

Manure / Biosolids Applied

20								
21	Manure / Biosolids Applied							
22								
23	Date applied	Analysis	Appl Type	Rate/Ac - Unit	Total Qty - Unit	Equipment	Appl. Depth ('	
24								
25								
26								

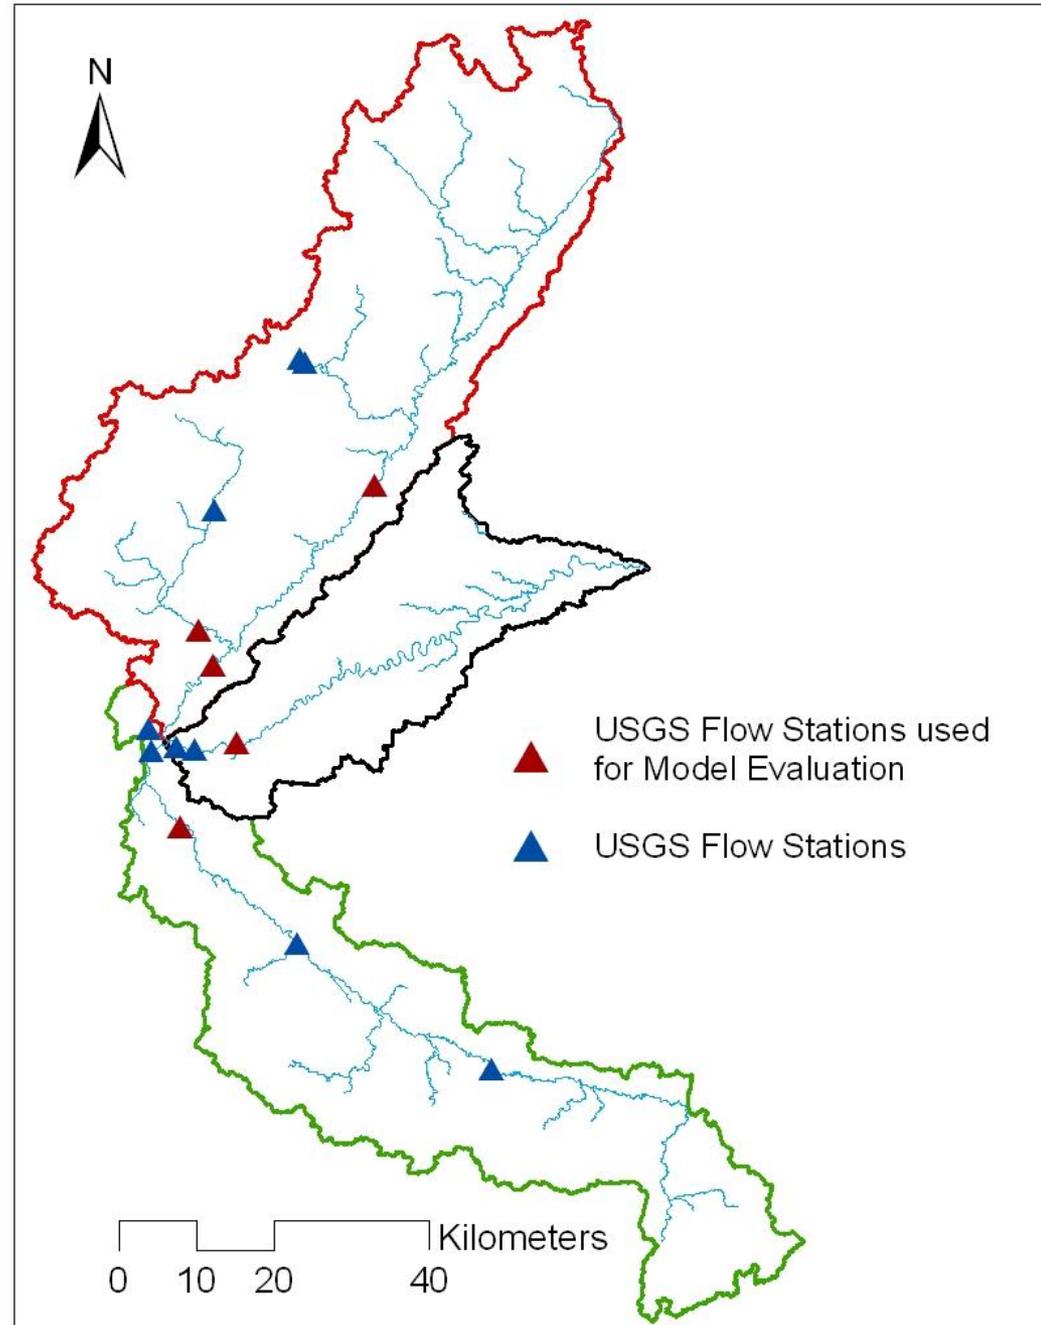

Herbicides:

27	Herbicides:							
28								
29	Date applied	Type		Rate/Ac - Unit	Total Qty - Unit	Equipment		
30	6-Nov-10	Fall Burndown Glyphosate, Cloak, 2-4-D				4730	JD Sprayer	
31	25-Jun-11	Roundup Powermax				4730		
32	13-Jul-11	Ascend		oz	oz	4730		

Insecticides / Fungicides

33								
34	Insecticides / Fungicides							
35								
36	Date applied	Type		Rate/Ac - Unit	Total Qty - Unit	Unit Price	Total cost	
37	None							
38								

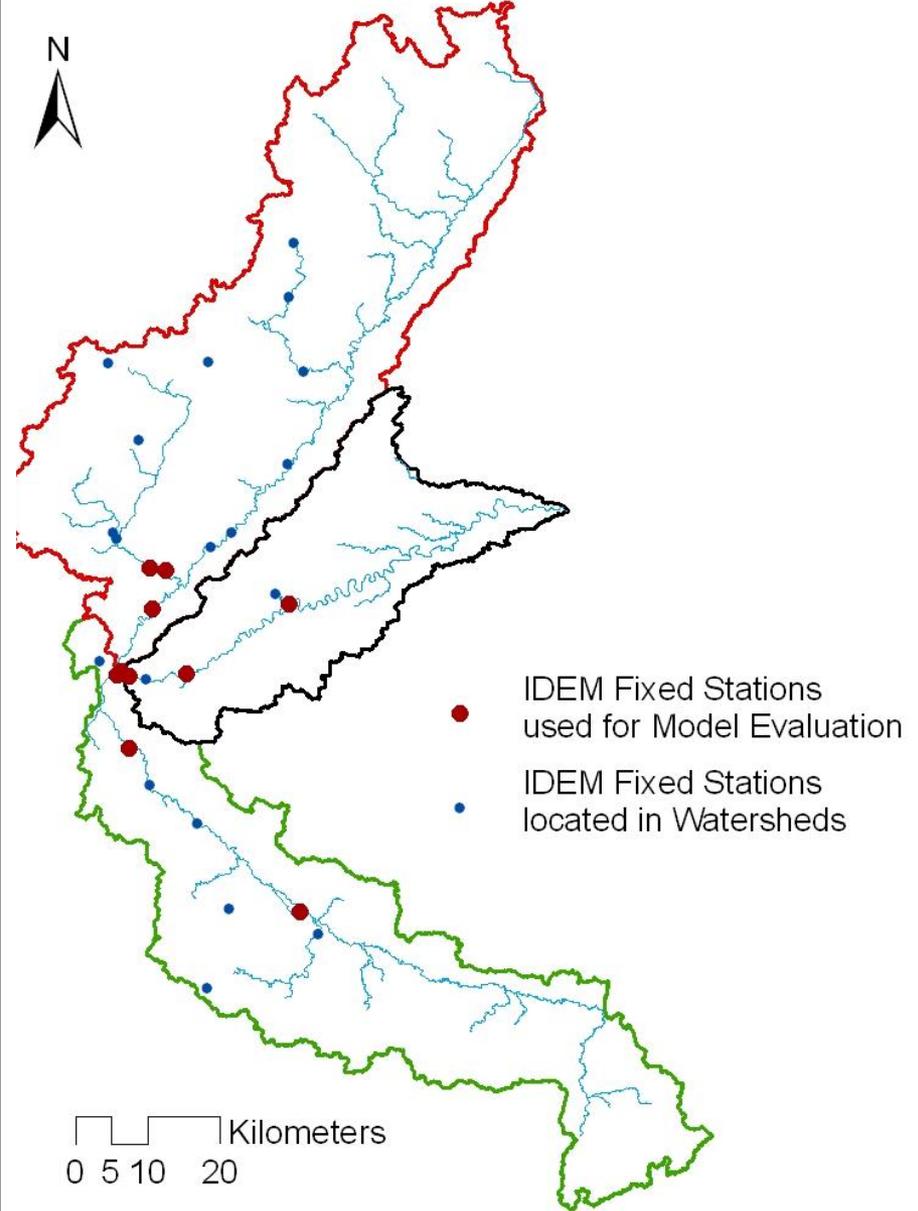

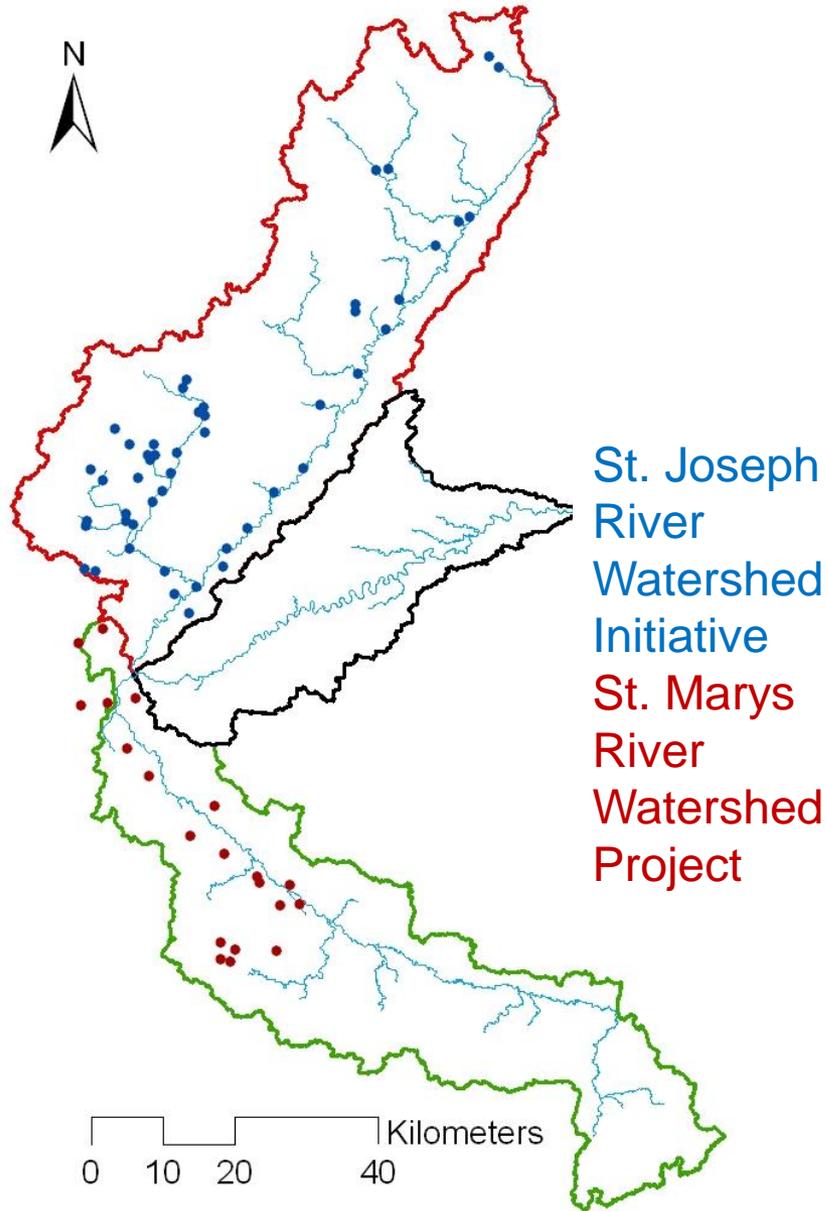

Data for Model Calibration and Evaluation: **1. Flow**

Data for evaluation: Water Quality from Indiana Department of Environmental Management data

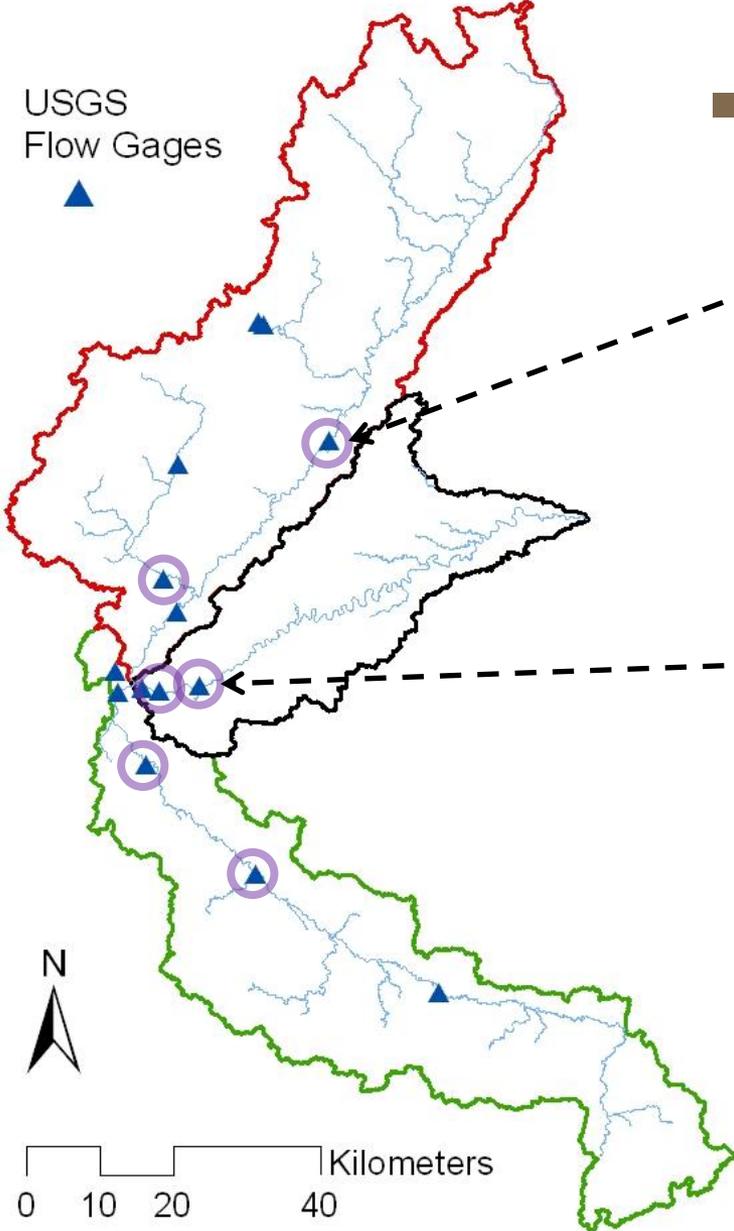

Watershed	Station Name	Begin	End	No. Samples		
				TSS	TP	NO3+ NO2
St. Joseph	LEJ100-0002	2001	2010	102	99	100
	LEJ100-0003	1991	2010	210	211	190
	LEJ090-0008	1999	2001	24	27	27
	LEJ090-0026	2001	2010	87	101	105
St. Mary	LES060-0004	1990	2010	217	217	195
	LES060-0005	1991	2010	217	214	199
	LES040-0007	1991	2010	217	218	203
Upper Maumee	LEM010-0012	2001	2010	102	108	99
	LEM010-0013	1991	2010	219	221	222
	LEM010-0014	1991	2010	227	232	231

Data for evaluation: Water Quality

Data for evaluation: Water Quality

USGS
Flow Gages

- USGS water quality

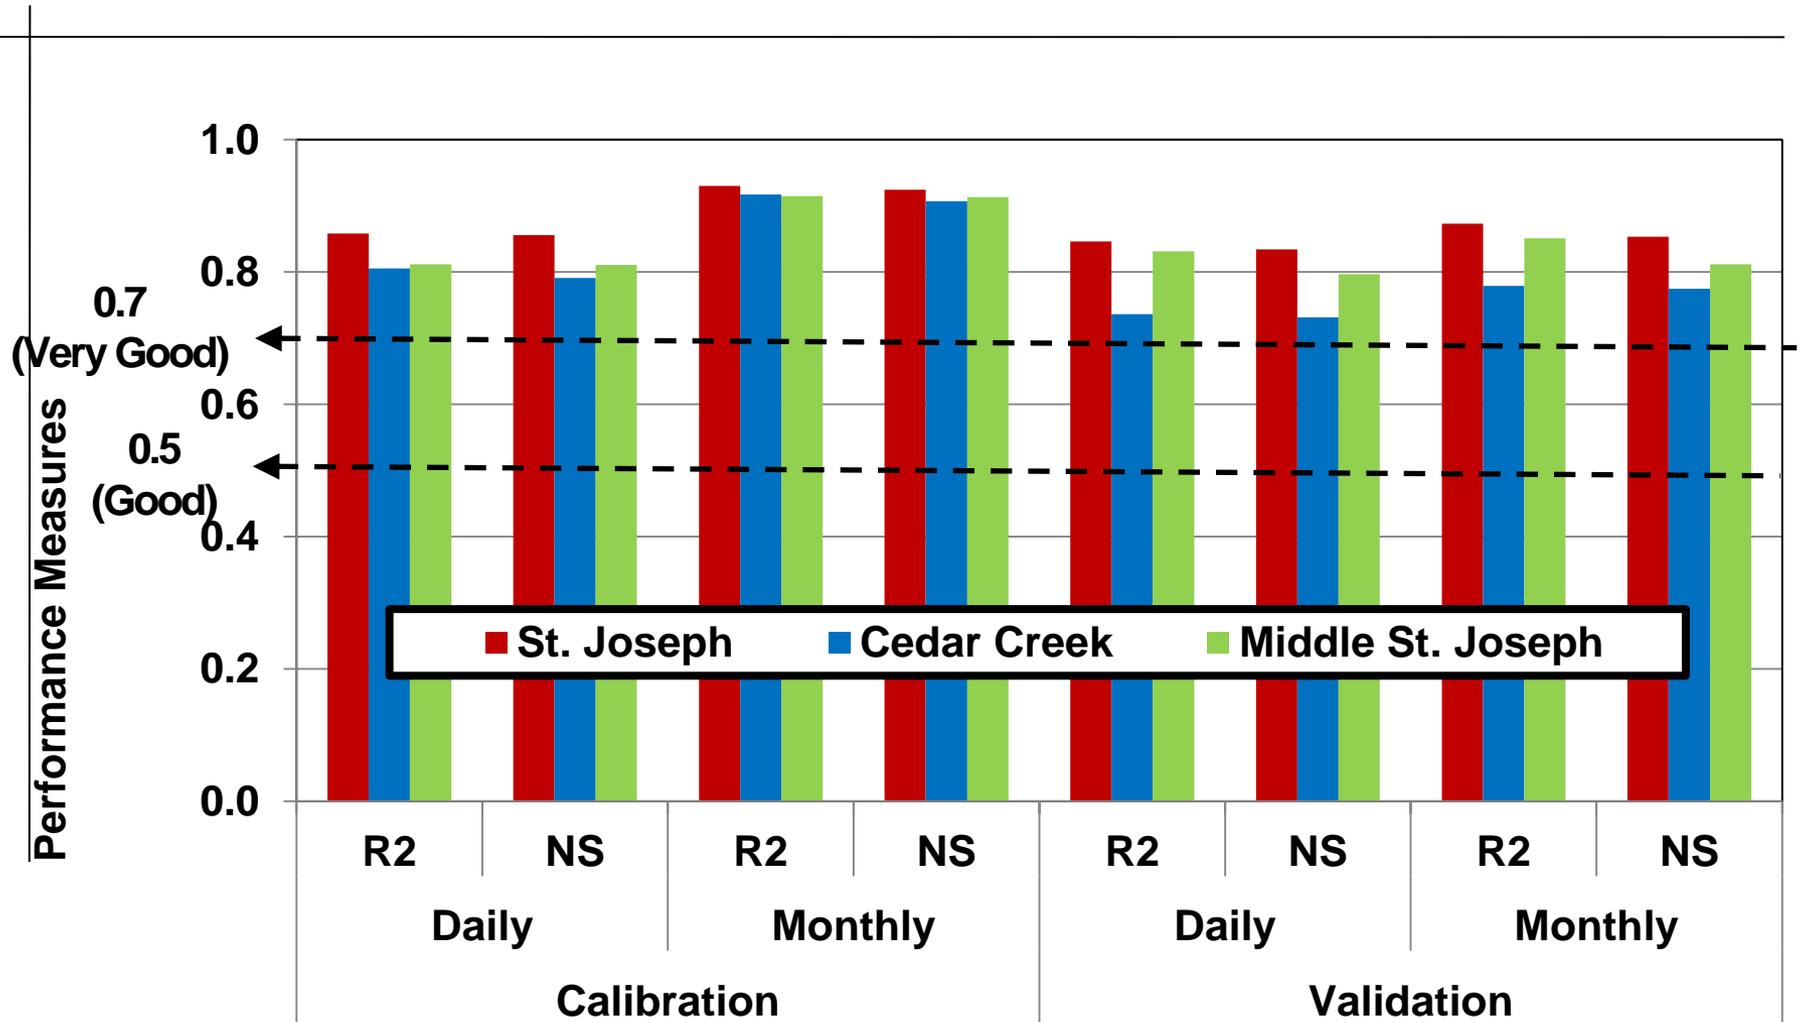

- Newville USGS station

- Defiance, OH: St. Joseph
 - SS (suspended sediment, 85), TP (88), & NO₃ (89) between 1996 and 2004

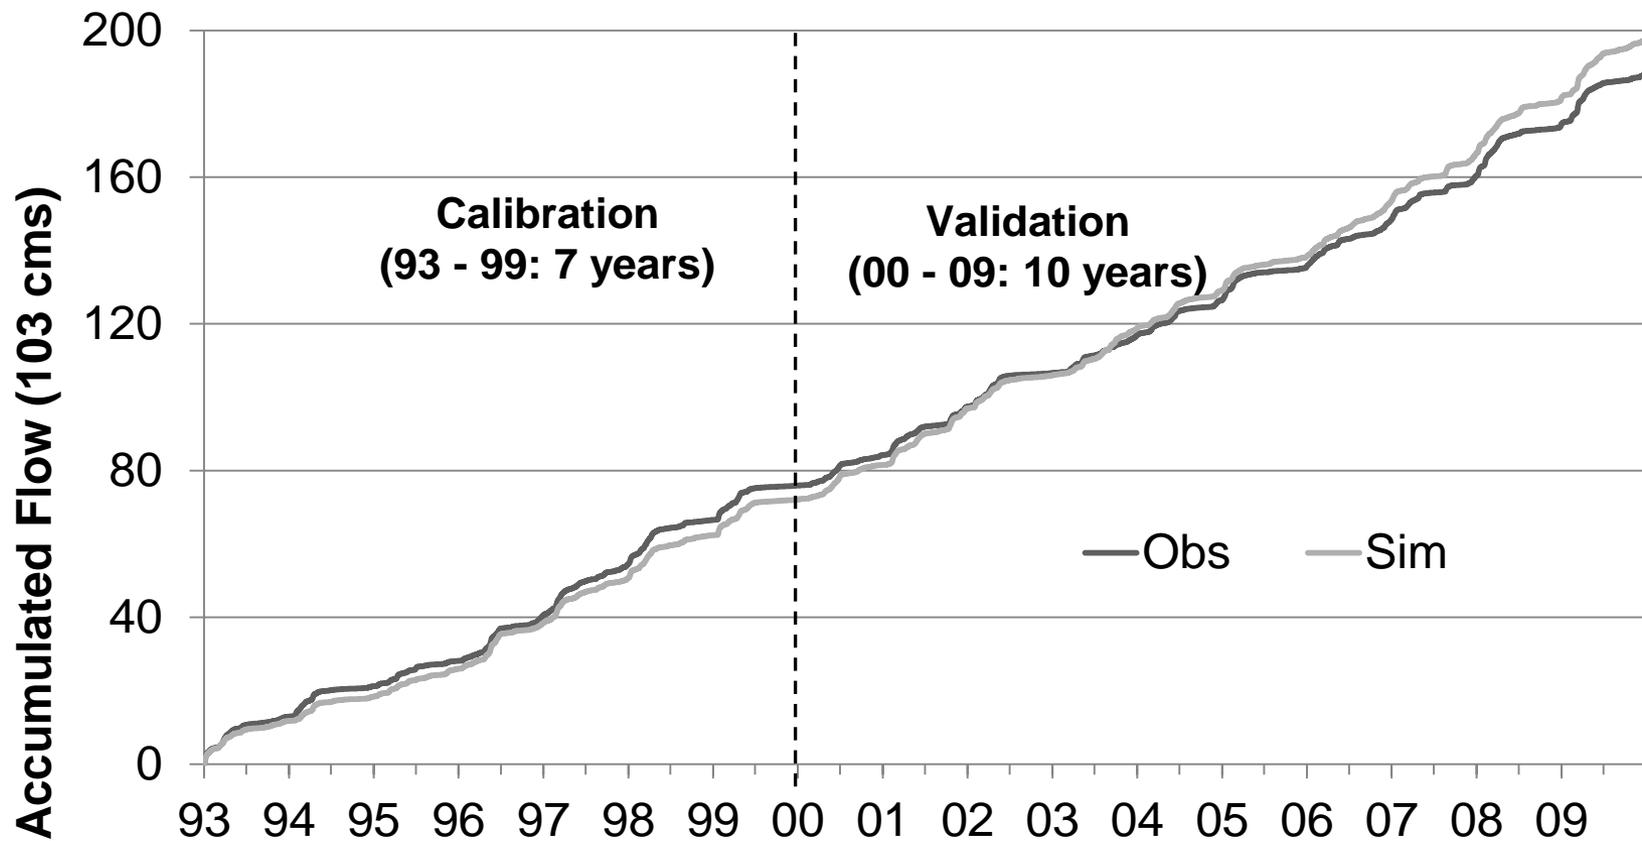

- Newhaven USGS station

- Allen, IN: Upper Maumee
 - SS (suspended sediment, 32), TP (33), & NO₃ (33) between 1996 and 1998

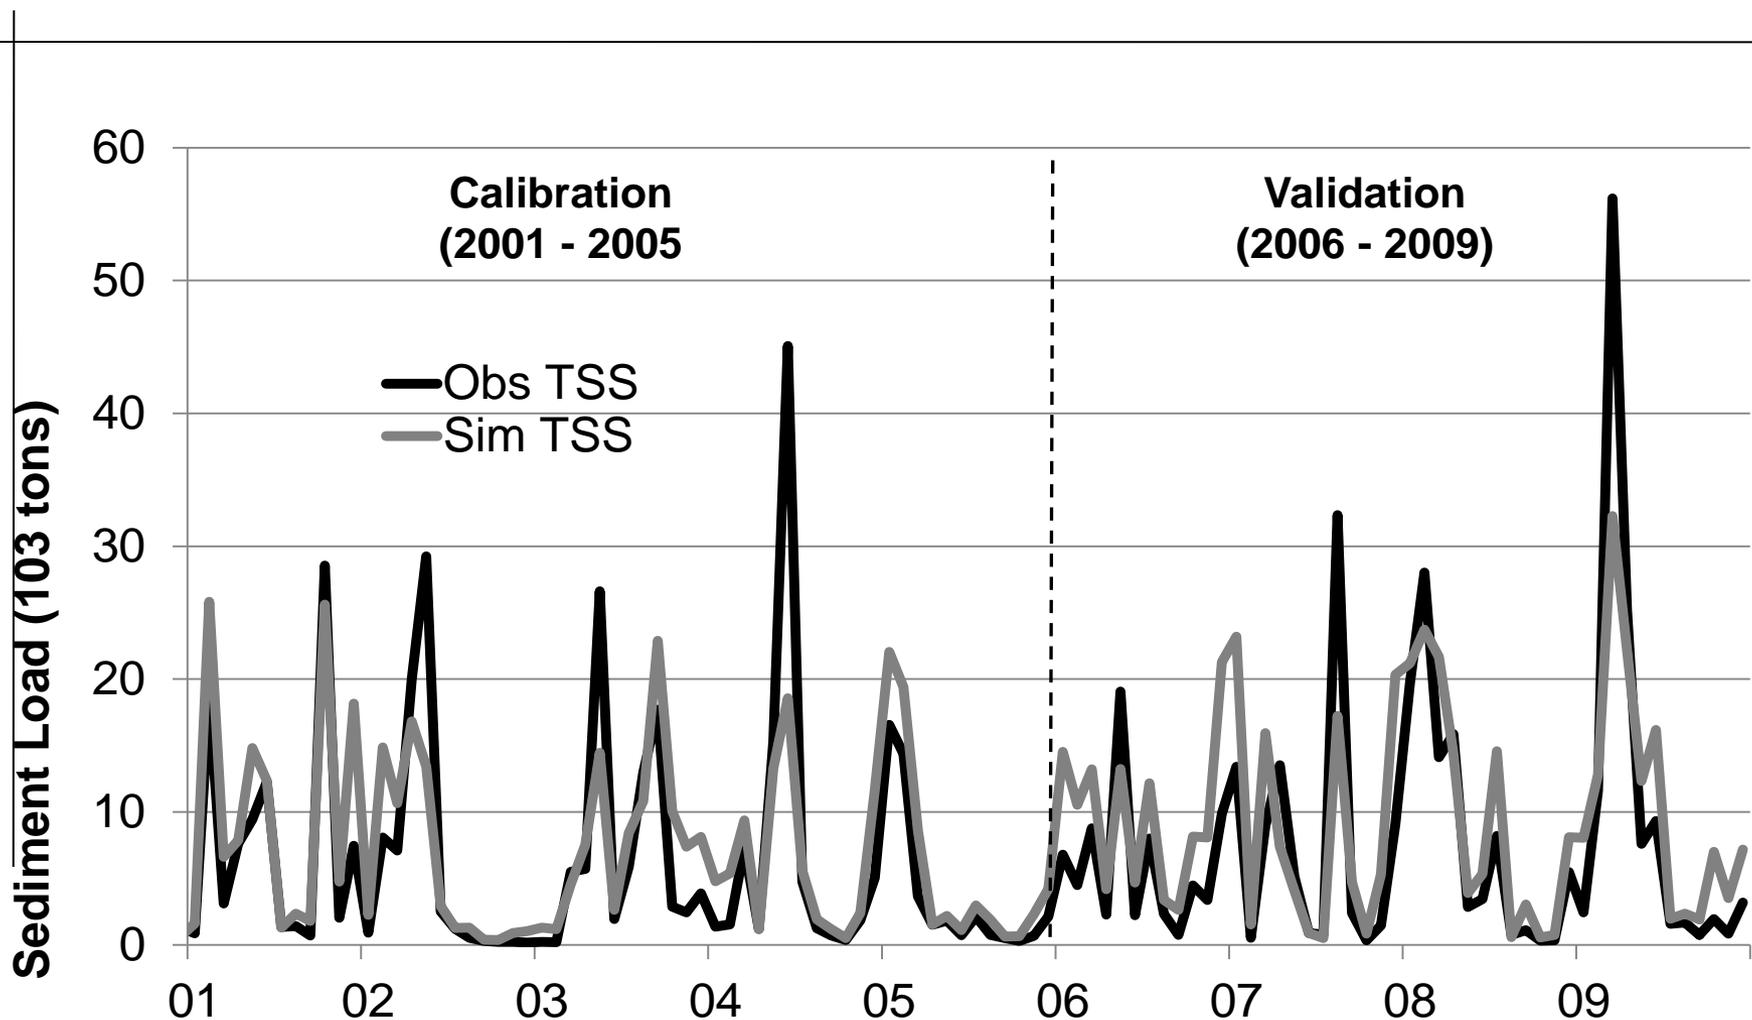

Calibrated Hydrology Simulation

Calibrated Hydrology Simulation

TSS Simulation – St. Joseph

DOE Funded Project

- Overall goal is to conduct a watershed-scale sustainability assessment of multiple energy crops and removal of crop residues
- Assessment conducted in two watersheds representative of Upper Midwest
 - Wildcat Creek watershed
 - **St. Joseph River watershed**
- Four year project (2010-2014) funded by DOE
